Detailed Code Smells

High Complexity high

Function add has high complexity (79)

VALUE
79

```
LINE: 7   FUNC: add
```

💡 **RECOMMENDATION:**
Refactor complex logic: Break down complex conditions and loops

High Complexity high

Function subtract has high complexity (89)

VALUE
89

```
LINE: 11   FUNC: subtract
```

💡 **RECOMMENDATION:**
Refactor complex logic: Break down complex conditions and loops

High Complexity high

Function multiply has high complexity (90)

VALUE
90

```
LINE: 15   FUNC: multiply
```

💡 **RECOMMENDATION:**
Refactor complex logic: Break down complex conditions and loops

🧩 High Complexity high

VALUE
180

Function divide has high complexity (180)

```
LINE: 19   FUNC: divide
```

💡 **RECOMMENDATION:**
Refactor complex logic: Break down complex conditions and loops

🧩 High Complexity high

VALUE
276

Function main has high complexity (276)

```
LINE: 25   FUNC: main
```

💡 **RECOMMENDATION:**
Refactor complex logic: Break down complex conditions and loops
